All measurements and dimensions are approximates and may change without notice. Consult your physician before beginning any exercise routine. Never swim alone or allow unsupervised children access to the unit. Must be installed according to all national and local codes. KBF-0515

The Ultimate Aquatic Experience

Take the comforts of home to a whole new level with the addition of a swim spa. The PDC Spas, FX Series swim spas combine the luxury of a hot tub with the benefits of year-round aquatic fitness. All four models in the FX Series offer the rewards of a traditional hot tub spa with comfortable body sculpted seating, hydrotherapy jetting and temperature selection. The spacious fitness zone features a fully adjustable, advanced resistance current for an effective aquatic workout. Experience the rewards of personal well-being, relaxation and family togetherness in the privacy of your own backyard with the addition of a PDC Spas swim spa.

A New Generation of Fitness

Gentle on your joints and back, the buoyancy of aquatic exercise provides an effective stress-less road to fitness. With the strategic position of our Synergy Pro™ water current, the resistance flow is smooth and balanced within the fitness channel for the best of workouts. Fully adjustable, you decide how gentle or challenging your routine should be. The fitness zone is wide and deep enough for beginner to competitive swim training, the use of treadmills, underwater bikes and water aerobics exercising. Complete every workout with a soothing hydrotherapy massage assuring a total sense of health and well-being.

FX Series Swim Spa Distinction

All FX Series swim spas are delivered ready for install, and the installation possibilities are endless. Requiring only a level solid surface, you can choose to enjoy your swim spa in the backyard, on a deck or even indoors. Many owners begin enjoying their swim spa the day of delivery.

- There is no need for connection to household plumbing. These units are complete with their own heating and filtration systems, requiring an initial fill with a garden hose.
- The FX Series swim spas utilize a very effective water purification system of UV and ozone, EverPure™, eliminating that annoying chlorine smell often associated with a public pool.
- Our PDC Spas swim spa models are designed for simple install and easy relocation. Delivered as a one-piece unit with cabinetry sides intact, your FX Series swim spa requires no additional assembly on site, and can be moved to a different location in your current home or take it with you should you relocate.
- Our proven TemperLok™ insulation system assures economical operation and year-round use. Every model is designed to provide flawless enjoyment regardless of season, even in the coldest of temperatures.
- Our extra wide and deep fitness channel offers ample space for family fun. Enjoy a summer afternoon splashing in the water without the maintenance of a swimming pool, with the added benefit of a relaxing soak in the massaging spa seats for the perfect end to a perfect day.
- All PDC Spas swim spa models feature a locking safety cover for security and thermal retention.

Benefits of Aquatic Exercise

Want to feel healthier, boost your energy and improve your quality of life? A regular exercise program is proven to do just that at any age or fitness level. A lifestyle including frequent exercise benefits the cardiovascular system, reduces the risk of many health problems, increases muscular strength and balance. However, many find it difficult to fit a visit to the gym in their already hectic day. Traffic, weather, even the thought of a public setting workout keeps you away from a busy gym. With the convenience of your very own swim spa, a simple walk to the backyard provides the privacy of a personal workout. A healthier lifestyle and a happier you awaits.

Aquatic exercise offers a safe and enjoyable alternative to the joint pounding workout of fitness training. The moment you enter the warm water, your muscles are immediately working together to balance and stabilize; increasing muscle and joint strength, stamina, and core stability. The natural buoyancy of water protects your joints and muscles from possible injury associated with traditional treadmill and pavement exercising.

- Swimming** A typical home pool is too short and too expensive to maintain for a year-round exercise routine. The FX Series swim spa models feature a unique Synergy Pro™ water current system for the optimum of resistance training designed for the beginner to the competitive swimmer. The exclusive insulation and thermal cover assures your workout continues no matter the weather. Because you have full adjustment of the Synergy Pro™ system, a simple turn of the PowerSelector™ and you choose the most gentle of water current for beginners, to a medium flow matching your training needs, to the most powerful current for that demanding swim experience.
- Walking** Using an underwater treadmill, the water buoyancy relieves pressure associated with back, hip, knee and ankle pain often associated with traditional walking and running. Make your workout your own with an adjustment of the Synergy Pro™ current for a gentle walk to the most challenging of workouts.
- Resistance Training** The AquaFlex™ system, by BOWSWIM™, provides the ultimate in aquatic low-impact resistance exercise-ing for strength, training, and rehabilitation. Swimming is known as the best fitness exercise for low-impact, calorie burning and weight loss. Add the AquaFlex™ to your workout and the results are significantly increased. Standard on every FX Series model, the reinforced carbon/fiber telescoping pole snaps easily into a receptor fitting. This revolutionary technology transforms your swim spa into a nearly stress free, impact free training machine. The ability of the adjustable tether to maintain the body in a nearly horizontal position changes the nature of aquatic exercise. It is the only system offering “variable fit” to the added benefits horizontal water exercise brings to fitness and rehabilitation. The horizontal support, unique to this system, allows full body therapy without fear of injury often experienced in traditional therapy programs. With AquaFlex™, you exercise, train, rehabilitate, strengthen and tone. And you do it better, smarter and more efficiently.
- Water Aerobics** Even the simplest movements when performed underwater take on a new level of workout. From lifting weights, to yoga positions, to simple stretching, the support and resistance of water alone enhance the benefits of exercise. The AquaBar™ offers support and balance for any exercise you choose.

So Much More Than a Workout

Don't be fooled into thinking FX Series swim spas are only for serious athletes. While these units offer an array of fitness benefits, their year-round use, ease of maintenance and simple install make them a unique and highly desirable product to anyone. The FX Series models feature fun in the water, fitness in the water and a relaxing hot tub massage under a star filled sky. You and your entire family will enjoy all the benefits of adding a swim spa to your lifestyle has to offer.

- Post Workout Cool Down** Relax those tired muscles with the ultimate of cool downs. Let the healing begin as you lean into the RX6 full body massage column where hydrojets massage your shoulders, upper and lower back, wrapping your body in healing comfort. Your routine is not complete until you relax in the two contoured fitness zone seats. Each and every body part is rejuvenated with deep tissue, powerful jets soothing shoulder, hip and thigh areas, while directional jets pinpoint neck, calves and ankles.
- Hydrotherapy Massage** Step into the warm, massaging waters and let the tensions and stress of the day melt. Much like having a personal masseuse, those annoying minor aches and pains are soothed, providing full body relaxation from the natural effects of heat and water. Hydrotherapy is one of the oldest, most effective and safest ways to treat common ailments and relieve tension. In as few as twenty minutes, circulation improves, muscles relax and tensions are eased. You will find that you sleep better, waking up refreshed and rejuvenated.

The FX219 Dual Zone model is the epitome of swim spa ownership. Not only is there a full size aquatic fitness zone, two body sculpted seats and a pair of RX6™ full body massage columns, you can also relax in a five seat hot tub for year round hydrotherapy massage enjoyment. The fitness “zone” and the hot tub “zone” feature separate heating, filtration, jet power and lighting controls. You have the option to enjoy both zones year-round or if you so choose, to use only the fitness swim zone in the summer and only the hot tub zone during the winter months. The choice is yours and the benefits are endless.

- Year Round Family Time** The FX Series swim spa is the perfect family center where relaxing, playing and much needed together time meet. A PDC Spa swim spa offers plenty of space to enjoy water fun, cool down on a hot day, or leisurely soak up some sun, and without the headaches and cost of a traditional pool.

Built with Quality in the USA

Designed, developed and built by American craftsmen in the heart of Pennsylvania, each PDC Spa swim spa is constructed with only the finest of raw materials and proven manufacturing processes. Cast acrylic sheet supplied by Lucite® begins the production as the durable colored outer layer of each ergonomically designed model. Units are then backed with multiple layers of hand-rolled fiberglass and non-filled resins for a unit so strong it can actually stand on its own. Each FX Series swim spa is backed with a 35 year structural warranty and a 15 year finish warranty guaranteed by a company that has produced quality products for over five decades.

- TemperLok™ Energy Design** Trapped waste heat in the dead air space behind the cabinet is recycled keeping your swim spa operating efficiently and economically. All PDC spa models meet or exceed the industry energy standards, known as the CEC; California Energy Commission Title 20, by as much as 32% over competitive brands.
- EverPure™ Water Treatment** The PDC EverPure™ ozone system produces pure ozone, nature's powerful oxidizer destroying organic and inorganic contaminants instantly and continuously. The EverPure™ system is cleansing your swim spa water whenever the pump is filtering. It is completely silent and costs pennies a day to operate. Exclusive to PDC Spas, our Ever-Lite™ indicator lets you know your swim spa is clean and inviting. A quick glance at the cabinet mounted light will assure you the EverPure™ ozone is hard at work keeping your unit sanitized and pure without you ever having to lift a finger.
- Safety Thermal Cover** Our locking thermal covers are designed in two sections, each folding in half for a convenient, thermally efficient cover to your swim spa. Three year warranty, --- approved.
- PermaWood™ Cabinet** This virtually maintenance free cabinet withstands weather conditions for a durable yet attractive finish to your swim spa.
- Lighting Features** Multiple colored, low energy LED lighting adds to the beauty and safety of your swim spa. MotionGlow™ underwater lighting is standard on all FX Series models, with the Allure™ and Illusion™ lighting packages optional.
